

Mega Pyramid Coherence Study- 2024-25

Instrument

Global Consciousness Project RNG

Device **#397** – Installed inside the **Mega Pyramid at Pyramid Valley International**

Background Coherence Level

~117

Typical operating range of the Mega Pyramid RNG device.

Highest Coherence Burst Recorded

693.8

Nearly **6×** higher than the normal background level.

Date: **7 June 2025**

Highest Daily Average Coherence

201

Date: **20 May 2024**

Almost **double the normal baseline**.

Global Network Comparison

Typical global RNG deviation:

-0.01 to +0.01

This means the Mega Pyramid device spikes are **orders of magnitude larger than global background fluctuations**.

Largest Multi-Day Coherence Event

29–31 May 2025

Date	Device Average
29 May	151
30 May	149
31 May	142

Global network remained **near neutral** during this period.

Extreme Coherence Ratio

Peak event vs background:

$693 \div 117 \approx 5.9\times$ amplification

One-Line Insight

The Mega Pyramid RNG occasionally records coherence bursts up to six times stronger than its normal background level, while the global network remains largely unchanged.

Executive Brief

Coherence Measurements inside the Mega Pyramid

Pyramid Valley International (PVI)

Study Instrument

Global Consciousness Project RNG

Device #397 – Installed inside the Mega Pyramid

Reference Baseline

Global RNG Network

Key Observations

- The Mega Pyramid device shows a **stable background coherence level around ~117**.
 - At certain times, the device produces **extreme bursts reaching nearly 700**, almost **6× higher than normal background levels**.
 - The **global RNG network typically fluctuates only between –0.01 and +0.01**, making these spikes unusually large by comparison.
-

Most Significant Coherence Events

Date	Device 397	Global Network
7 Jun 2025	693.8	+4.53
1 Oct 2025	689.8	~0
1 Oct 2025	684.7	~0

Insight

Two of the three strongest events occurred **without any global network deviation**, indicating a **localized phenomenon**.

Strongest Daily Coherence Events

Date	Daily Avg	Global Network
20 May 2024	201	-0.001
1 May 2025	167	+0.005
16 Jul 2024	164	+0.006
12 May 2024	156	-0.004

Insight

Several strong events occur **while the global network remains neutral**, suggesting a **local coherence field effect**.

Multi-Day Coherence Clusters

Some coherence increases persist for **several days**.

Example – **May 2025**

Date	Device Avg
29 May	151
30 May	149
31 May	142

Global network remained **near zero** during this period.

Possible Influencing Factors

Elevated coherence periods sometimes coincide with:

- **Large meditation gatherings** (Guru Purnima, Buddha Purnima)
- **Lunar cycles** (Full Moon periods)
- **Solar / geomagnetic disturbances**

However, these factors **do not explain all events**, suggesting a combination of influences.

Key Insight

The Mega Pyramid device occasionally shows **large coherence bursts not reflected in the global RNG network.**

This pattern suggests the possibility of **localized coherence phenomena within the pyramid environment.**

Implication

The Mega Pyramid at Pyramid Valley International may represent a **unique environment for studying interactions between:**

- meditation and collective intention
 - environmental and cosmic influences
 - coherence-sensitive measurement instruments
-
